

Petition for the Resignation of Ms. Eva Rocha

We, César Silva Ferro, along with concerned students and parents of Instituto Superior Técnico (IST), have come together to address a matter of utmost importance - the continued employment of Ms. Eva Rocha as a teacher at our esteemed institution. This petition aims to shed light on the issues and concerns that have emerged due to Ms. Rocha's teaching methods and conduct within the academic environment of IST. We firmly believe that the welfare and education of our students are paramount and must be safeguarded at all costs, which is why we are calling for Ms. Rocha's immediate resignation.

IST, known for its commitment to academic excellence, innovation, and nurturing the intellectual growth of its students, has a cherished legacy that we hold dear. Our institution's reputation has been built on the dedication of educators who inspire, engage, and empower our students to reach their full potential. However, it is with a heavy heart that we must address the troubling issues that have arisen under Ms. Rocha's tenure.

Reasons for Demission Request

- **Ineffective Teaching Methods:** Ms. Rocha's teaching methods have been consistently ineffective and have not adequately catered to the needs of our students. Many students have expressed frustration over her inability to explain complex concepts, resulting in a negative impact on their academic performance.
- **Lack of Classroom Management:** Maintaining discipline and order in the classroom is crucial for a conducive learning environment. Unfortunately, Ms. Rocha has struggled with classroom management, leading to disruptions that hinder the learning experience for all students.
- **Unprofessional Conduct:** Ms. Rocha's behavior towards both students and colleagues has been unprofessional and often disrespectful. This has created an uncomfortable atmosphere within the school, making it difficult for students to thrive academically and emotionally.
- **Failure to Address Concerns:** Numerous complaints have been brought to the attention of the school administration, and despite these concerns being well-documented, Ms. Rocha has shown little effort to rectify her teaching methods or behaviour. This lack of accountability has further eroded our confidence in her ability to be an effective educator.
- **Detrimental Impact on Student Wellbeing:** It is our responsibility to ensure that our students receive a positive and nurturing educational experience. Ms. Rocha's presence in the school has, regrettably, had the opposite effect, causing emotional distress to many of our students.

In conclusion, we, César Silva Ferro, along with the concerned students, parents, and dedicated members of the Instituto Superior Técnico (IST) community, have come together in unwavering dedication to our institution's legacy of academic excellence. We are compelled by a shared commitment to the welfare and educational growth of our esteemed establishment. With this dedication in mind, we address the pressing issue surrounding Ms. Eva Rocha's continued role as a teacher at IST. Our institution, with its storied history and tradition of academic excellence, has flourished through the tireless efforts of educators who have consistently inspired, engaged, and empowered our students to reach their highest potential. It is this cherished spirit that compels us to voice our concerns regarding Ms. Rocha's teaching methods and her conduct within our academic community.

Collective Voice and Action

To ensure that our concerns are heard loud and clear, we have taken proactive measures to collect signatures from IST students, parents, and concerned individuals who support our cause. This document table serves as a testament to our collective voice, affirming that we are not alone in our conviction that change is necessary for the betterment of our beloved institution.

We, the undersigned, echo a fervent and resolute request for the resignation of Ms. Eva Rocha from her position as a teacher at Instituto Superior Técnico. It is our steadfast belief that her continued employment poses a significant detriment to the education and overall well-being of our students.
